NOMENCLATURE

IRR_i irradinac of the ith row in a PV array
G   Standard irradiance level of 1000 w/m^2

M   number of rows in a PV array
N   number of columns in a PV array
N_e number of exclusive combination in a PV array
Y   irradiance matrix
U   integer link matrix
I   normalized irradiance matrix
u   penalty coefficient
H_i index function
$\emptyset_i$ constraint function
