

ACKNOWLEDGMENT

- The result was obtained through the financial support of the Ministry of Education, Youth and Sports of the Czech Republic and the European Union (European Structural and Investment Funds - Operational Programme Research, Development and Education) in the frames of the project "Modular platform for autonomous chassis of specialized electric vehicles for freight and equipment transportation". Reg. No. CZ.02.1.01/0.0/0.0/16 025/0007293.

- The authors would like also to thank Tallinn University of Technology in Estonia, for supporting this research.
